REDEFINING RECOVERY.

Corporate Profile

The Ameyra Global Story

Built on Innovation. Powered by Engineering.

ISO 13485 Certified Medical Device Manufacturer

1

WHERE IT BEGAN: ATATRI Design

Ameyra Global's journey began at ATATRI Design, a **BIRAC BIG Award-winning product innovation company**, where advanced medical devices and rehabilitation technologies were conceived through product innovation, industrial design, and engineering.

2

ENGINEERING GUIDANCE: VXL Group

Throughout Ameyra Global's development, guidance from VXL Group's **35+ years** of precision engineering and advanced manufacturing excellence helped shape engineering practices, manufacturability, quality systems, and production readiness.

3

THE FOUNDATION: Innovation Meets Engineering

By combining healthcare product innovation with disciplined engineering practices and manufacturing-ready design, Ameyra Global established the foundation for developing advanced rehabilitation and recovery technologies.

4

TODAY: Ameyra Global

Ameyra Global designs, engineers, validates, and manufactures advanced rehabilitation and recovery technologies, delivering complete medical systems from concept to commercialization.

AMEYRA was born from healthcare innovation, shaped by engineering excellence, and built to redefine rehabilitation and recovery technologies.

Our Mission

Building the Future of Recovery Technologies

Developing intelligent systems that accelerate recovery, improve mobility, optimize wellness, and enhance human performance — through engineering, clinical science, and technology.

Rehabilitation Technologies

Hyperbaric Oxygen Therapy

Hydrotherapy Rehabilitation

Sports Recovery Systems

Wellness & Longevity

Clinical Intelligence Systems

Product Portfolio

A Complete Recovery Ecosystem

Ameyra Global delivers an integrated portfolio of rehabilitation, recovery, and wellness technologies engineered to support the complete patient journey—from clinical treatment to performance optimization.

OXYZEN

Hyperbaric Oxygen Therapy Systems

- OXYZEN Uno
- OXYZEN Duo
- OXYZEN Quad
- OXYZEN Hexa
- OXYZEN Octa

HYDROZEN

Advanced Hydrotherapy Rehabilitation Systems

- HYDROZEN Stream
- HYDROZEN Flow

Recovery & Wellness Technologies

Next-Generation Recovery Ecosystem

- NITROZEN
- AUROZEN
- THERMAZEN

HYPERBARIC OXYGEN THERAPY

OXYZEN Multiplace HBOT Chamber

Designed for hospitals and advanced hyperbaric centres, the OXYZEN Multiplace system combines high-capacity treatment, precision pressure control and patented chamber engineering within a robust medical-grade platform.

Operating Pressure

2 ATA / 3 ATA

Medical-grade pressure architecture.

Configurations

Duo • Quadro • Hexa • Octa

Scalable treatment capacity.

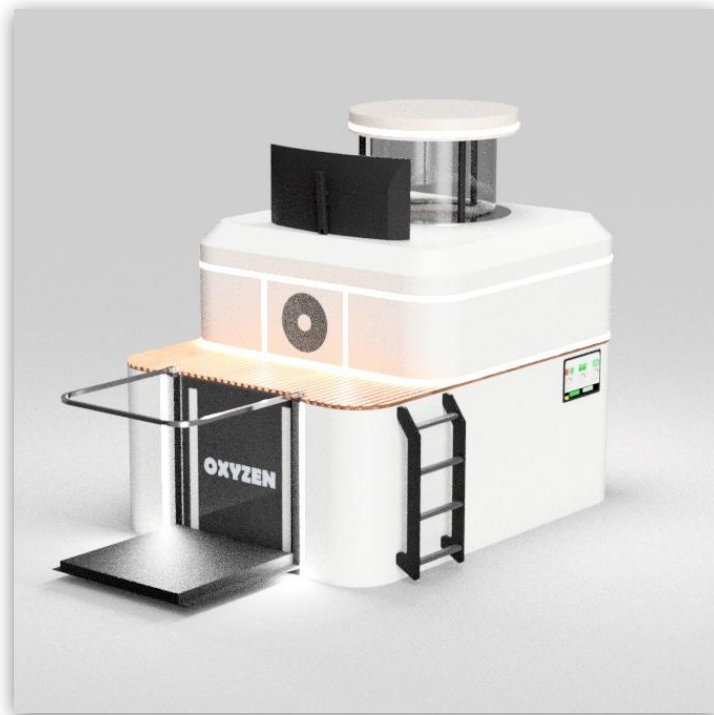

Patented Architecture

Zero Electronics Inside Chamber

Enhanced operational safety.

OXYZEN Monoplace HBOT Chamber

Designed for single-patient hyperbaric therapy, the OXYZEN Monoplace chamber combines compact architecture, patented safety engineering and intuitive clinical operations within a precision-engineered platform designed for everyday clinical use.

Key Features

Touchscreen Control • Audio
Communication • Environmental
Sensors • Entertainment System

Specification

Single Patient • 2 ATA / 3 ATA •
Medical Grade • Patented
Chamber Architecture

Ideal For

Hospitals • Hyperbaric Clinics •
Rehabilitation Centres • Sports
Medicine • Integrative Healthcare

HYDROZEN

Advanced Hydrotherapy Rehabilitation Systems

Core Features

- Integrated Underwater Treadmill
- Adjustable Water-Level Control
- Variable Speed Rehabilitation Training
- Thermal & Whirlpool Therapy
- Resistance Jet Systems
- Incline Modulation
- AI-Assisted Coaching
- Gait Analysis Integration

Applications

- Orthopedic & Neurological Rehabilitation
- Sports Conditioning & Performance Recovery
- Geriatric Mobility Therapy

HYDROZEN Stream

Clinical Rehabilitation

HYDROZEN Flow

Sports Performance & Recovery

Expanding Recovery Ecosystem

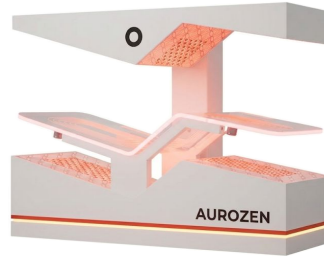

Advanced Wellness Technologies

Beyond rehabilitation, Ameyra Global is developing advanced wellness technologies that create a complete ecosystem for recovery, longevity, and human performance.

NITROZEN

Advanced Cold Water Therapy System for athletic recovery and inflammation management.

AUROZEN

Integrated Recovery & Wellness Pod featuring Red & Near-Infrared Light Therapy, PEMF, Vibroacoustic Therapy, Molecular Hydrogen Therapy, Guided Breathwork, and Zero-Gravity Positioning.

THERMAZEN

Advanced Infrared Sauna Systems for therapeutic heat recovery and longevity.

THE AMEYRA PHILOSOPHY

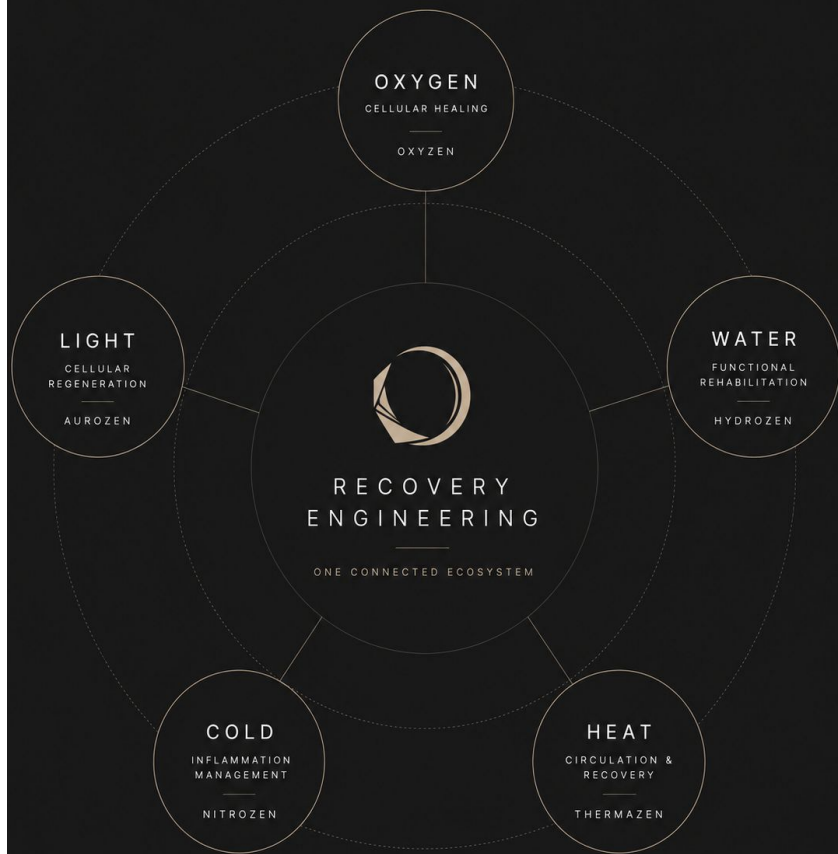

Recovery Engineering

Recovery,
designed rather than
left to chance.

Recovery is rarely achieved through a single intervention. It emerges when complementary therapeutic modalities work together to restore function, accelerate healing, and enhance long-term human performance.

At AMEYRA, oxygen, water, heat, cold, and light are engineered into one connected ecosystem, where every platform complements the others to deliver complete recovery outcomes.

Five Therapeutic Modalities.
One Connected Recovery Ecosystem.

The AMEYRA Difference

Every AMEYRA platform is guided by a single engineering philosophy—from concept and validation to manufacturing, deployment, and long-term clinical performance.

1 Engineered for Clinical Outcomes

Every platform begins with a measurable clinical objective. Engineering decisions are guided by patient safety, therapeutic effectiveness, usability, and long-term reliability.

2 Designed as One Ecosystem

Recovery is most effective when therapies work together. AMEYRA develops interconnected platforms that combine complementary therapeutic modalities into one unified recovery ecosystem.

3 Precision by Design

From industrial design and engineering validation to ISO 13485 manufacturing, every product is developed for precision, manufacturability, reliability, and global deployment.

4 Built to Evolve

Intelligent technologies, connected systems, and continuous innovation ensure every AMEYRA platform evolves alongside modern healthcare and rehabilitation.

" We don't build standalone medical devices. We engineer connected recovery systems that improve human outcomes. "

Engineering the Future of Recovery

Ameyra Global is redefining rehabilitation and recovery through an integrated ecosystem of intelligent healthcare technologies — from oxygen therapy to cold immersion, hydrotherapy to infrared wellness.

OXYZEN

Hyperbaric Oxygen Therapy

HYDROZEN

Hydrotherapy Rehabilitation

NITROZEN

Cold Water Therapy

AUROZEN

Integrated Wellness Pod

THERMAZEN

Infrared Sauna Systems

ISO 13485 Certified • Patented Technologies • Designed & Manufactured in India
