Oxygenate your healing

The New Reality in HBOT

OXYZEN stands out as a leading choice for Hyperbaric Oxygen Therapy (HBOT) due to its combination of advanced technology, user-friendly design, and versatility.

- **Customizable Therapy:** Adjustable pressure, dive settings and oxygen settings, with pre-set programs for specific health needs and at a touch of a button.
- **Safety First:** Equipped with real-time monitoring and emergency features for a safe, controlled experience. Patented zero electronic system inside the chamber making it absolutely safe from hazards while keeping the entertainment for the patients possible though sound exciters & projectors.
- **Easy to Use:** Intuitive touchscreen controls, remote access, and pre-set options make it simple and easily trainable for new operators.
- **Flexible Oxygen Supply:** Choose between the Cylinder Model or Generator Model making it flexible for the facility.
- **Entertainment Module:** Enjoy music, movies, and more for a relaxing therapy session.
- **Non-Claustrophobic Design:** The ergonomic design stemming from a user centric design approach has made OXYZEN feel like sitting in a bigger space than its footprint occupies.

OXYZEN

Xperience the Ease of Operation

The OXYZEN Hyperbaric Oxygen Therapy Chamber is designed with ease of use in mind. Its **User-Friendly Control System** ensures that users of all levels, from professionals to home users, can operate the chamber effortlessly and confidently.

Key Features of the OXYZEN User-Friendly Control System

Intuitive Touchscreen Interface

- Pressure Adjustment: Customize pressure levels effortlessly.
- Oxygen Flow Control: Tailor oxygen concentration to your needs.
- Timer and Session Tracking: Set durations and monitor progress in real-time.
- Easy Navigation: User-friendly design with clear icons and instructions.

Pre-Set Programs

Tailored Therapy: Quick access to pre-set programs for:

- Sports Recovery
- Post-Surgery Healing
- Cognitive Enhancement
- Initiate therapy with just a few taps.

Safety Alerts and Real-Time Monitoring

- Real-Time Pressure Monitoring: Tracks pressure levels continuously.
- Automatic Alerts: Notifies users of unusual changes for added safety.

OXYZEN

Zen - like calm, Inside and Out

Innovation across various aspects of the design has made it possible to create a safety that transcends the requirements:

- **Rotating Door:** In unfortunate cases of system/ power failures, the largest worry in HBOTs are to safely evacuate the chamber. Pressure release is generally manual but opening the heavy doors become a strenuous process. To facilitate this, arrogating door which opens halfway helping patients evacuate immediately is a key feature of the design.
- **Zero Electronics inside the Chamber:** Patented zero electronic system inside the chamber making it absolutely safe from hazards while keeping the entertainment for the patients possible though sound exciters & projectors.
- **Pre-charged Fire Extinguisher:** Pressurised tank with water helps out the fire in inadvertent cases immediately. Equipped with operation possible both from inside and outside ensures flexible safety.
- **Manual Redundancy:** With both manual and automated valves provided, with between them with a flick of a switch and operate at all times without any discrepancies.
- **Control System with reminders:** To err is human, to help, is our state of the art control system which gives timely reminders, safety procedures and warnings for service before and during the operation.
- **Remote Monitoring:** With automated patient entry system, any over oxygenation or other diagnostics is made possible and can be remotely overseen by the practitioner.

OXYZEN

Efficient Use of Time, Optimal Healing

The OXYZEN Hyperbaric Oxygen Therapy Chamber is not just about healing—it's also designed to provide a calming and enjoyable environment during treatment. With the built-in **Entertainment Module**, your therapy sessions become more relaxing and immersive.

Features of the OXYZEN Entertainment Module

1. Projector

OXYZEN is equipped with a high-definition projector, allowing users to easily access entertainment options such as movies, tv shows, podcasts and music while also showing instructions from pre-recorded messages.

2. Immersive Sound System

The chamber features high-quality, built-in bone conduction speakers, providing a crisp, clear audio experience. The soundproof design ensures that external noise doesn't disrupt your relaxation.

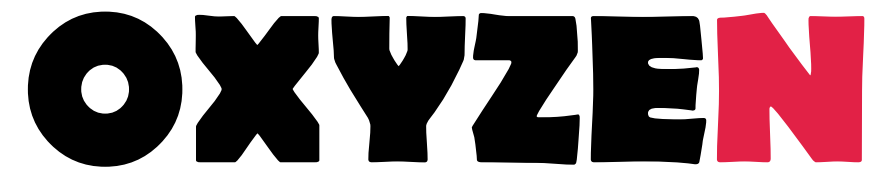

3. Customizable Visuals

Choose from a variety of nature scenes, ambient visuals, and guided meditation videos to create a serene atmosphere during your session.

4. Climate Control:

Adjust temperature and humidity according to your requirements

Novel Technology, New Possibilities

Testimonial

Dr. Priya Vasudevan

"I've seen remarkable improvements in my patients using the OXYZEN Hyperbaric Oxygen Therapy Chamber. The chamber's ease of use, coupled with its advanced safety features, makes it a valuable addition to any medical practice."

Dr. Aishwarya Arjun

"The OXYZEN chamber has been a game-changer for post-operative recovery. My patients experience reduced inflammation and quicker healing times, which has significantly improved their rehabilitation process. I highly recommend it for both clinical and personal use due to its reliability and proven results."

Dr. Anu Karthee

"As a naturopathy practitioner, I've seen how OXYZEN Hyperbaric Oxygen Therapy can significantly enhance the body's natural healing capacity. By increasing oxygen levels, HBOT supports better circulation, reduces oxidative stress, and aids in tissue repair. For lifestyle disorders like metabolic syndrome, chronic pain, and fatigue, it is my top priority recommendation to help patients achieve faster recovery and long-term health improvement."
